

ERHARDT C

ERHARDT C

THE CLASSIC CASSETTE AWNING FOR
YOUR OPEN SPACE

ERHARDT C WITH A NEW, ELEGANT CASSETTE DESIGN

The ERHARDT C is the classic cassette awning from ERHARDT, and it creates an immediate impression thanks to its redesigned cassette. When retracted, the elegant cassette design is clearly visible – this blend of form and function makes it ideal for almost any architectural style. The fabric and the mechanism are well protected from wind and weather, which means the awning will last for many years. Various equipment options are available, allowing you to customise the awning to suit your needs. How you spend your free time and enjoy your awning is up to you: whether you prefer the cool shade or the pleasant half-shade, simply press a button and the ERHARDT C awning will adapt to your individual needs and create the perfect atmosphere on your terrace, whatever the time of day. So you can enjoy every single moment under your ERHARDT C awning.

ERHARDT C

ONE PRODUCT – MANY OPTIONS

Design

The redesigned ERHARDT cassette makes an immediate impression. The slim, rounded shape of the cassette and the side cover complement each other perfectly, giving the awning a discreet and elegant look that makes it the ideal companion for your architectural style.

Versatile installation options

The ERHARDT C awning is very easy to install thanks to the wide range of mounting options, including brackets for mounting on walls, ceilings and rafters, that give you a high level of flexibility to adapt it to your space.

All-round protection for fabric and mechanism

The entire mechanism and the awning fabric shaft are hidden when the Erhardt C cassette awning is in the retracted position. Special sealing applied to the drop profile protects the cassette from splashing water, making the awning fully waterproof and ensuring maximum protection from the elements while giving the awning a discreet, understated look. It also helps the fabric retain its brightness for longer and makes the mechanism more reliable.

Easy to use

To make the awning as easy to use as possible, ERHARDT recommends installing a remote control motor. An optional oscillation sensor ensures the awning will close automatically during strong winds, making it even more safe and giving you even more freedom. Optional automatic sun control is also available.

The perfect evening ambiance with light and warmth

Thanks to the atmospheric, optional lighting with a lighting rail, you can spend cosy evenings on your terrace. The optional infrared heaters quickly produce a cosy, comforting warmth, so you can enjoy your evenings to the full.

CE Made in Germany

All ERHARDT Markisenbau products are made in Burtenbach, Bavaria. All-round service and continuous production control guarantee high quality.
