

MY FLEXIBLE FAVOURITE PLACE.

# THE ERHARDT PM<sup>light</sup>.

 ERHARDT<sup>®</sup>  
MARKISEN

## My flexible favourite place

As a specialist in sun protection, ERHARDT has the right awning and roofing solution for more compact outdoor areas. The PM<sup>light</sup> pergola awning helps you turn even smaller roof terraces or balconies into your favourite place. It reliably protects outdoor areas of up to 22.5m<sup>2</sup> from the sun and gentle weather influences, and it resists moderate winds. It also stands out with its elegant, timeless design and offers attractive value for money.

#### Standard colours

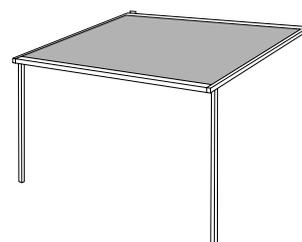

#### Trend colours

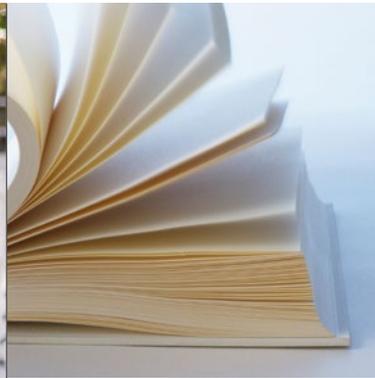

There are four standard colours to choose from when creating your PM<sup>light</sup> pergola awning. Our trend colours and all colours in the RAL range are available for a surcharge.

Our wide range of mountings guarantees easy installation – even on challenging surfaces. And our functional clip bracket ensures your awning has a sleek look. The awning can be mounted in series, and its compact design, plus an optional rain cover, provides optimum protection for the fabric and the mechanism.

## MY FAVOURITE PLACE

# To read undisturbed.

In the summer, I love chilling out and reading on my balcony. I enjoy a warm day, but I can do without the glare of the sun and prying eyes from my neighbours – so I just press a button to extend my PM<sup>light</sup>, and then I can focus on myself and whatever I'm reading. If later on the sun gets a bit lower in the sky, all I have to do is lower the side awnings on the foot supports to continue enjoying the peace of my retreat.

The side zip ensures there's no light gap between the awning fabric and the rail. And the front drop profile is also flush, making the PM<sup>light</sup> a reliable awning offering full protection from unwanted sunshine and light rain. Even if your favourite place can be windy, the robust foot supports keep you protected in wind speeds up to 48km/h (wind resistance class 3).

*I feel sheltered under  
the PM<sup>light</sup> – in the sun,  
when it's windy and  
even in light rain.*

## MY FAVOURITE PLACE

# For a family meal.

There's nothing I like more than being with my family – it's time I really enjoy. So after dinner, we spend a long time in the evenings together on the terrace, telling each other about our day. And the nature around us is the icing on the cake. When it gets cooler, we just press a button to switch on the integrated heater so we can spend the whole evening outside.

“

*The best thing about my day is evenings as a family on our terrace.*

”

The optional heater makes the PM<sup>light</sup> an even nicer place to be. It's easy to operate with a remote control, and it helps everyone on the terrace feel comfortable, regardless of the temperature.

# THE ERHARDT PM<sup>light</sup>: AN OVERVIEW

## All features of the ERHARDT PM<sup>light</sup>
